AVALON Professional STRUCTURAL rope access

Avalon has grown to become a well respected key player in the New Zealand high/difficult rope access field.

Our management style remains 'hands on' and we pride ourselves on a high degree of availability and excellent client communication.

Our reputation brings the best staff to us, allowing us to deliver you a service that is second to none.

// Experience

Avalon has been operating in NZ since 1996, specialising in High/Difficult rope access works. Our two most senior staff have been involved in industrial rope access since its inception in Europe in the late 1980's.

// Innovation

Our depth of experience and knowledge allows us to provide clients with an informed opinion followed up with efficient and truly innovative solutions.

// Performance

Avalon's business is the delivery of a safe, professional service, leaving our clients with a high quality end result, on time, at a competitive cost.

// Personnel

Our staff includes qualified Engineers. Our personnel are our most important resource and we recruit and keep the best people in the industry. Active connections with the industry worldwide keep us up to date with the latest developments.

// Materials Resources & Supplies

Avalon sources and stocks various fully certified high performance products from proven international suppliers.

// Rapid Response

Avalon's head office is in Hamilton, allowing us to provide a very rapid response to clients over the Central and Northern North Island. We also have South Island based teams and operate throughout New Zealand and overseas.

// Hazard Assessment

99% of Avalons work is OSH notifiable. We have an exemplary safety record and have assisted DOL with safety directives and advice.
